MoLabs
25 Vitosha Blvd., floor 2, Sofia, BG
Nigeria

Dear Sir/Mam

I am writing to express my interest in the **Full Stack Developer (Node.js/React.js)** at **MoLabs.** With over six years of experience in full-stack web engineering and professional certifications in frontend, backend, and database engineering, project management, and DevOps, I am excited about the opportunity to contribute to your team's success.

Originally trained in mechanical engineering, I transitioned to software development driven by a passion for technology and innovation. Holding a Bachelor of Technology from Rivers State University of Science and Technology (now Rivers State University), I have continuously honed my skills and expertise through ongoing learning and growth.

I am particularly drawn to **MoLabs Ltd.** because it provides a range of custom enterprise solutions to improve efficiency and product performance for a wide variety of satisfied clients. And being fully remote company. I am eager to leverage my expertise in **Node.js/React.js, software security, defensive coding and user experience, problem solving, micro-service architectural designs and devOps principles**, to drive impactful results for your projects.

Thank you for considering my application. I am available for further discussion and can be reached at +2348068578748 or kingdom.adele@gmail.com.

Warm regards,

KINGDOM ADELE
